## Retracted Papers from Medical Universities in China Show Up Trend

Using the data from Retraction Watch [1], we made an analysis on the retracted papers from 18 Chinese medical universities, and found that the numbers of retraction increased with the year of publications, highlighting the worrying academic misconduct in China's medical universities.

Nanjing Medical University (NJMU) has the largest number of retracted papers. Among the papers published by author(s) from NJMU during the year of 2000 and 2023, 222 of them were

retracted. The followings are Southern Medical University and Capital Medical University, having 186 and 176, respectively, papers retracted.

The largest number of retractions were posted to the papers published in 2022, suggesting worsening academic integrity in China's medical universities, and strengthening effort to identify academic misconduct by the scientific communities. The Chinese authority made some effort to fight against academic misconduct, but the outcome seems to be limited.

<b>Name (Chinese)</b>	<b>Name (English)</b>	<b>Abbreviation</b>
南方医科大学	Southern Medical University	SMU
广东医科大学	Guangdong Medical University	GDMU
广州中医药大学	Guangzhou University of Chinese Medicine	GZUCM
广州医科大学	Guangzhou Medical University	GZMU
南京医科大学	Nanjing Medical University	NJMU
